Recommendation

STANDARD FINISH*
 With an established reputation for durability and an extensive range of colours, Mos recommends the use of the Dulux Duralloy® finish as the standard finish on its products. Duralloy® is a tough thermosetting powder coating that exhibits decorative and durable characteristics suitable for a broad range of exterior product applications where excellent overall performance is required. This finish is not suitable for products situated within 100m of salt water.
 The default colour we recommend is 'Black Satin'.

STANDARD OPTIONS*
 Mos provides this shortlisted selection of colours from the Duralloy® colour range to assist in the process of making a selection. These colours represent a good cross section of the spectrum and can be considered timeless classics that will not go out of style.

PREMIUM OPTIONS*
 Dulux, and other quality products, are also available in a range of specialty powder coat finishes that may be more suited to your project. Please refer to the full Dulux range online for their full selection, or contact us directly for further advice. These premium options will typically incur additional cost.

*Mos can match the specified powder coat system that may be required for use in your project. Please contact us directly if your needs vary.
 Mos cannot guarantee that all colours will be available at all times.
 Mos reserves the right to use an equivalent powder coat finish / system if the Dulux product is unavailable.
